

# Ocean Imaging

---

## March 2023 – SeaView MOBILE for iOS (iPhones & iPads) is here!

Ocean Imaging’s SeaView Fishing© service has released its satellite fishing service app for Apple mobile devices– SeaView Mobile©. The pioneer in satellite oceanography, Ocean Imaging, has been providing oceanographic and weather information to fishers and scientific researchers since 1983. Now our powerful worldwide SeaView fish finding service app is available on the Apple Store! SeaView Mobile© delivers ready-to-use oceanographic analysis products including cloud-free sea surface temperature (SST) imagery, more single-scene SST image data than anyone, the highest resolution SST and chlorophyll imagery as well as sea surface height anomaly, ocean currents and much more! All to save you fuel, time and money while helping improve your fishing strategy right from your mobile device. The time tested, most accurate SeaView Fishing data is now at your fingertips. SeaView Mobile© for Apple/iOS devices can now be downloaded from the [Apple Store](#) and SeaView Mobile© for Android 10+ is available from the [Google Play Store](#). ***To get the most out of SeaView, pair up SeaView Mobile with SeaView Desktop to harness all the decision-making power SeaView has to offer. Check out our web site for all the details:***
